A MARINE DISPLAY SUCH AS THE CITY HAS NEVER SEEN BEFORE,

From Shore to Shore, Bay and Rivers Were a Fairy Land of Colored Light, in Which It Rained Red, White and Blue-Crowds at the Battery and on Biverside Drive Wild with Delight-Thousands Out Affont and Ashore.

The day of Dewey celebration on the water ended in a roaring, popping, banging blaze of glory last night. Fireworks displays lit up the east side, the west side and all around the town. Not only did great boats londed down with fireworks sweep down all the water-ways and circle about the lower Bay, but in the parks throughout the middle of the city the sky was painted red, white and blue and all the other shades of color known to the pyrotechnic art. The East River celebration was brought to an untimely but a tremendously effective close by ing the main supply of fireworks for the parade in that waterway. This harpened off the foot of Fifty-ninth street, and the city for blocks and blocks around was as light as day for fifteen or twenty minutes, while the impromptu explosions and flashes of colored fire lit up the melodramatic work of three police tugs in rescuing the panic-stricken fireworks men on the floats. The only damage done by the accident was the entire destruction of one of the floats and the disappointment of people who waited to see a display between Fifty-ninth street and the Bridge.

The succession of little showers that came up as the fireworks exhibition at the Battery was being brought to a close did not interfere at all with its success, for the men who were handling the display promptly made up their minds that the best way to keep their powder from getting wet was to set it all off at once, and the result was such as to make the boys and girls from six to sixty. who witnessed it, crase from their minds all thought of all Fourth of July celebrations that they ever saw or ever hoped to see. The fireworks all over the city were witnessed by tremendous crowds. Not all of the people in the city were able to leave their homes and their affairs to see the daylig' parade, but last night everybody, except the cables and the grandmothers who staved home to take care of them, seemed to be out along the waterfront, or in the parks, where the beautiful sights were to be seen. In a great many cases, noreover, the grandmothers and the babies

The biggest crowds and the biggest displays of fireworks were off the Battery, on floats and on Governor's, Bedloe's and Ellis Islands. At 5:30 o'clock Inspector Harley had posted men along the Battery's sea wall from the Iron Steamboat pler around to the Barge Office. five feet apart. They were there none too soon, for long before 6 o'clock a crowd three deep lined the sea wall. It was still light then.
The vessels in the harbor had not lighted their lanterne, and only the faint glow of a few electric lamps along the Jersey shore gave token of the illumination to come. But down in the Elevated station at South Ferry and Battery Place and from the terminuses of the surface roads that run to the southern end of the borough steady streams of people were pouring into the Park. While it was still light enough to distinguish the outlines of the tall buildings, buman figures began to appear along the edges of the roofs of the Army building, the Standard Oil building, the Bowling Green building, Cheseborough building, and all the other skyscrapers that look out over the Battery Park. The Barge Office and the Dock Department's pier were crowded full. Col. Jones, the Superintendent of the Aquarium, made his employees and their families happy by providing seats for them on the roof of the Aquarium. which by its shape enabled these who sat upon it to watch both the rivers and the upper bay and the great crowd in the park at the

During every moment of the time, from dusk until the last colored lights faded out and the steamers stole away from off the face of waters, it was a wonderful sight that they saw. First, as the light faded, the big ateamers came puffing down the North River, drifted across the bay from Governor's Island to rooklyn and puffed back again. As it became darker the ship's lights began shining out of the darker spots against the Jersey, Staten Island and the Brooklyn shores. Out of the darkest part of the Jersey side, just off Ellis Island, without a moment's warning there sprang into sight the jewelled outline of a great coastwise steamship. Strings of electric lights ran from her bow to her masthead and thence to her stern, along her rails and cross-yards. The crowd that and gathered when this picture sprang out of the dusk was a mighty one and it sent up a mighty cheer that was taken up by the whistles of the tugs and steamers that were crossing and recrossing the bay, until the whole lower part of the city thus made known its approval part of the city thus made known its approval of the big ship's decoration. Then another and another, all the way from Ellis Island to a point half way between Bedloe's Island and Governor's Island, displayed their outlines in the same way. Some of them were string with red and white and blue lanterns. Some of them had no decorations above their main decks, but had ropes and ropes of incandescent lights glittering up and down their sides. These steamers were all of them excursion steamers which had people on board to view the fireworks, and which had followed the committee's suggestion of taking position in the Bay early and remaining there until it was time to go home, so that accidents might be avoided.

in the Bay early and remaining there until it was time to go home, so that accidents might be avoided.

Meantime all the little lights, the red and green side lights, the fore and aftights on the little tugs, and the big steamers, and the yastes accession and passed and re-passed one another and elrected across the enraptured view of the people who lined the sca-wall and the rolling across the enraptured view of the people who lined the sca-wall and the rolling across the enraptured view of the people who lined the sca-wall and the rolling across the lights worked away to heave a space just off the Battery clear, and as the lights worked away to the southward they formed an unbroken glowing band from as far as one could see up the North River clear around to the place where the big searchlights on the Bridge were beginning to throw their heams up and down the choppy water-ways about Governor's Island.

Now and then a big sailing craft came dipping its way daintily among the steamers and the lights fell upon its great salls for a moment, so that it would appear as a phantom ship close inshore, and then when the lights fell upon its great salls for a moment, so that it would appear as a phantom ship close inshore, and then when the lights disting duelty in under the Dock Department pler, and drifted along the sea-wall hack and forth in a long sinusual line. This display in itself was enough to occupy the keenest attention of those who could see it. There were some, indeed, who grew weary of the long wait they had undertaken in order to get goot places, and who went home without seeing anything more than the display of lights on the vessels and on the buildings along the shore, perfectly satisfied and believing that they had seen enough to pay them for their trouble.

For the people who came late, and who piled up against Inspector Harvey's patient, good-

play of lights on the vessels and on the ulidings along the shore, perfectly satisfied and believing that they had seen enough to part them for their trouble.

It is not to be the proble of the proper of the proper in form of them knew that they must wait for nearly two hours before seeing anything more than the hats of the people in front of them. The stream of people who came from the elevated steadily every moment, and long before were find the proper in front of them. The stream of people who came from the several streams of the people in front of them. The stream of people who came from the several streams of the people in front of them. The stream of people who came from the several streams of the people in front of them. The stream of people who came from the several streams of the people in front of them. The stream of people who came from the several streams of the people in front of them. The stream of people who came from the several streams of the people in front of them. The stream of people who came from the surface roads increasing the stream of the people in front of them. The stream of people who came from the surface roads increasing the stream of the people in front of them. The stream of the people in front of them. The stream of the people in front of them the surface roads increasing the stream of the people in front of the surface roads increasing the stream of the people in front of the surface roads increasing the stream of the people who came from the surface roads increasing the stream of the people who came from the surface roads increasing the stream of the people who came from the surface roads increasing the stream of the s

accompaniment, so that the crowd, realizing how fully the steamboars had taken the rendering of approval out of its hands, began to laugh. The laughter of 40,000 people is not a thing that any who were in places where they could hear it will ever forget.

When fireworks people make out a programme they fill it full of a succession of very interesting names of various kinds of rockets, and bombs, and saucessons, and things, but the people who see the fireworks don't know anything about these names, and very often don't know where rockets leave off and saucissons begin. They simply know that the world is jurisidedown and all on fire. At the end last night from ten feet above the water line to 500 feet in the air, the air was full of fireworks of every kind and description known from the beginning of all fireworks. Right in the midst of all atremendous portrait of Admiral Dewey appeared to the east of Castle Williams in outlines of white fire. It was as high, finot higher, than the castle itself, and was a much more satisfactory likeness than a good many that we have about us now-a-dars. The racket that greeted the picture was berond all describing: it was the racket of the morning named all over again, condensed into one spot, for while the great portrait turned, every captain in the harbor seemed to turn his ship scourse toward it, while he tooted. It unfortunately resulted in the picture being shut off from the view of the people on shore after the first few seconds, except those who were onton of high buildings. But the fleet up to Grant's Tomb must have heard the roaring homags that was puid to the portrait.

The rain began then, and the fireworks were finished just in time. The people began to make for the avenues of travel toward home. The rain indee everybody in a good deal of a houry, and the pilote came very near being caught unprepared. They had all been concentrated on the water side to keep the people turned their backs on them and rushed for Buttery place, the foot of Broadway, and south Forry. Some

ary style.

As soon as the three floats were in motion the men on them touched off a big lot of red fire as a signal for the boats clustered around the Olympia to get in line for the Battery.

A police boat half the procession, followed by the two turs with the floats which were surrounded and followed by a moticy collection. and followed by a moticy collection of craft from big ocean steamers to tiny steam numbers. The red fire on the floats was followed by a discharge of rockets, aerolites and ifferent kind of bombs, which continued until Castle Williams had been reached. The ands on some of the warships struck up as he freworks, passed and their searchlights dived over them.

til Caste Williams and been reached. The bands on some of the warships struck up as the breworks passed and their searchlights played over them.

Few fireworks appeared on shore to accompany the parade until Fourteenth street was reached, and then the big skyscrapers boomed up. From one big building near the water front no less than six enormous searchights played upon the procession, in addition to the incandescent lights which made the building a blaze of white.

As the parade neared the Battery the fireworks in the East River could be discerned and the scene as the two divisions came together was indescribable. The bay in front of the listiery became a volcano of fireworks. It lasted about fifteen minutes, and just as the supply of fireworks apparently had been exhausted it began to rain and the boats one and all scooled for their plers.

At fliverside Drive, the setting sun showed the warships at anchor in the North River, the Olympia at the head of the line which extended from: posite firmt's Tomb, as far down as Sixte th street, a multitude of smaller orait around. Can seem to the setting sun showed from a posite firmt's Tomb, as far down as Sixte th street, a multitude of smaller orait around a cancer of the set of t

darkness.

The picture seen from Grant's Tomb was one that will hardly be forgotten by any one who saw and many thousands had gone there to enjoy it. Along the stone wail of Riverside Drive, from the Jomb to Ninety-sixth street, the people stood four or five deep. The 200-joot rampart which fails steeply from the tomb to the edge of the water was covered, though those who found a place there had to haid on to the grass in order not to slide down. Vahicles of all kinds and a host of bicylists filled the drive. The crowds, whother they were on the top of the bluff or down on the shore, were unusually quiet. They seemed, in fact, overawed by the wonderful spectacle on the river, and hesitated to disturb the appreciation of it. darkness.

small fireworks and the burning of colored lights.

The fireworks display in Union Square began promptly at So'clock, and notwithstanding the greater attractions elsewhere a crowd numbering many thousands of people witnessed, the show. All of the set pieces and most of the other fireworks were set off in the Seventeenth street plaza at the north side of the square. The crowd therenbouts was so dense that the Broadway cable cars were barely able to make a way through it.

A liberal display of red and green fire, bombs and rockets formed the first part of the show, and later the Olympia, the American flag and Dewey's portrait were outlined in fire. The portrait, especially, was received with cheers. The sparks from some of the pieces drifted down among the crowd and in dangerous proximity to the decorations of nearby buildings, but there were no accidents.

A flery good night dismissed the crowd, most of whom immediately started for the lower end of the island, hoping to be in time to see some of the harbor illuminations.

Thousands Cheer the Home Displays While

The two official fireworks displays in the Borough of Brooklyn, one being in front of the old City Hall and the other on the slopes of the Prospect Heights Reservoir entrance, were each witnessed by crowds of people. The high grounds surrounding the Reservoir are admirably adapted for a pyrotechnical exhibition and the display last night was so arranged that the spectators, who imust have numbered 20,000, had a clear view of it from Flatbush avenue, the Plaza and the Eastern Parkway. For more than and Eastern Parkway sides of the Reservoir were brilliantly illuminated with powerful colored lights and the sky was constantly filled with marvellous pyrotechnical inventions, each discharge evoking plaudits from the specta-

The three special devices: "Welcome, Admiral," in large block letters of varied colors; the "U.S. S. Olympia" and the mammoth, fine portrait of Admiral Dewey were each greeted was just at the close that the Dewey picture blazed up and the enthusiastic plaudits which greeted it continued as long as a spark reclared it the finest of the kind ever presented

Ten thousand men, women and children witnessed the display in front of the Borough Hall. All the adjacent streets were crowded as were also the offices in the various business

Hall. All the adjacent streets were crowded as were also the offices in the various business buildings on Court. Fulton, Remsen, Montague and Washington streets. At 7:30 o'clock the tower on the hall was illuminated with colored lights, which were continued during the entire display of fireworks. At 80 clock two meteoric balloons were set at liberty and they at once sailed off in the direction of Manhattan. As they floated through the air they were kept in view by one of the big searchlights on the bridge tower throwing its strong rays upon them. When the set piece. "Welcome Admiral," which was ignited, there was a grand shout which could be heard blocks awny.

As the set piece which depicted in fire the cruiser Olympia was touched off the throng again cheered, and two engines on the Kings County Elevated Bailroad, which were passing in opposite directions, sailuted with their steam whistles. Then followed red fire, grini bombs, nexts of flery cobras and golden shower latteries.

This shore at Sea Gate in and around Norten's Point, Coney Island, was illuminated with course fire for several hours last night. The Adlantic Yacht Club was builliantly lit up for the occasion and it erected a large sign with incandescent lights bearing the words: "Set Gate Welcomes Dowey." The Bay Ridge and Fort Hamilton shore also shone forth with red fire and the large sign. "Welcome" with its 120 are lamps was displayed at the Edison shops at the foot of Sixty-fifth sireet.

The fireworks display on this side of the river presented a fine spectacle also to reope in Brookiyn. Roofs of dwelling houses, hotels, office buildings and the does a were crowded with persons watching the river presented a fine spectacle also to reope in Brookiyn. EAST EIVER PARADE MET DISASTER. Fireworks Float Blazed Up and Her Load Went Off Prematurely.

One bit of the plans for last night didn't mature exactly as had been arranged. The fireworks parade down the East River, which started from the southern end of Ward's Island at about 7 o'clock, met with picturesque East Fifty-ninth street. Thanks to the energy f Police Inspector Brooks and a squad of Central Office men under him, no lives were

carried on two floats, one called Mars and another. The fireworks, most of them were stored on Mars under tarpaulins When the procession started the fireworks were set off from the other float. Both floats were towed by the tugboat They were pretty close together. closer than Inspecter Brooks, who was following on the tug Patrick Cahill, thought was safe, and he had just ordered his roundsman. Cohen, to hall the Mars and tell the people on board of her to pull up a little closer to the tug, when with a splutter and s flash flames began to shoot out of her load of

In two seconds all was longuiston. The steamers and tugs that were accompanying the flottilla fied helter-skelter away from the burning float. The police boats, the Cahill, the A. J. White and another, were the only ones that hal their noses turned toward the free. The men on the Mars were running around her sides frantically trying to pick out a good spot, apparently, for jumping-offs purposes. By stern commands and threats of leaving them to drown if they jumped, Inspector Brooks kept them on board until he ran alongside and took them off. Then the Central Office men on the tugs turned the hose on the sputtering, blazing, excleding mass of fireworks. They were cheered in the work by crowds that had been worked up to a great state of excitement by the rescue of the operators in the glare of red fire.

The first order Inspector Brooks gave after he found the Mars was on fire wasto order both floats cut loose from their tugs. The one In two seconds alliwasiconfusion. The steam

To Cure La Grippe in Two Days Take Laxative Bromo Quintne Tablets. All drug-gists refund the money if it falls to cure. E.W. Grove's signature is on each box. 25c.—Ade. that was not burning, except as the fireworks people on board of her burned things systematically, butted her way off among the excursion craft, creating the wildest excitement among the centains and passengers. The men on her had absolutely no way of controlling her actions and all they could do was to keep on actting off fireworks. When the fire on the Mars was put out the King went out and caught the uninjured float and brought her in to the remains of the Mars. All of her fireworks had been exhausted while she was standing still, and those on the Mars that had not been prematurely exploded were coaked so the florilla went ingloriously down the river to the lower hay.

There a big stock of colored fire was borrowed from another float and the two boats joined those from the North River in illuminating the Bay. While thus engaged, the Mars bumped into the excursion ateamer Pleasure Bay and nearly scared her massengers to death, Nobody was hurt, but the steamer's forward rail was torn away.

CHEERS FOR LIPTON'S TACHT ERIN. The Cup Challenger and His Guests Cordialty Received All Along the Line. The Erin led the starboard column in the

post of honor in the division, and Sir Thomas board a large party of guests, among whom Charles Russell, Prince Leopold de Crov-Prince Reginald de Croy-Solre, William Gibson, A. D. Prayand, M. P., the Royal Ulster Yacht Club, H. C. Kelly, Hugh Macgildowney. Chevaller de Martino, II. S. King, a South African mine owner, William Barrie, Max Muller, Joe Lyons, Mr. and Mrs. Siegel, Mrs. and Miss Cleggett, John Young, William Fife, Jr., Thomas Ratsey and Dr. J.

Reid Mackay.

At Bay Ridge where the Erin lay at anchor during the morning she was almost as much an attraction as the Olympia, and the tugs and excursion steamers circled around the British yacht, and the excursionists cheered Sir Thomas Lipton and the Shamrock. About 11 o'clock the Erin moved over to Tompkinsville to take her position in the line of parade and when she reached that point the cheering was heartler than ever. Sir Themas was on the bridge and he was kept constantly raising girls on the tugboat Charm took up a position near the Erin and sang "The Wearing of the Green." "The Harp That Once Thro' Tara's Halls" and "Come Back to Erin." In acknowledgment of this the party on the Erin cheered the serenaders, Sir Thomas leading the cheer-

thousand other craft she was recognized on all sides and saluted. The reception given to the vacht was a surprise to Sir Thomas's party who had expected that they would be allowed to do honor to Dewey without any notice being taken of them. After returning to the anchorage Sir Thomas said: "I had expected that the parade would be a big demonstration, but I never dreamed of anything like what we did see. I never saw anything like the enthusi-

The Hon. Charles Russell said: "The naval demonstration at Spithead during the Queen's jubilee was a great display of warships but there were not nearly so many excursion boats out then as there were to-day and nothing like the enthusiasm. It was a grand show. As for the greetings to Sir Thomas, they were very gratifying and show that in this country all are true sportsmen and if Shamrock is the better boat you will be quite willing that the cup shall be taken away."

In the evening the Erin was illuminated from stem to stern. She anchored astern of the warships off Eightieth street. Three thousand incandescent electric lights were strung about the yacht, one string reaching from the bow over the mastheads to the stern. Over the smokestnek in letters formed of green light was the word "Erin." This was surmounted by a shamrock also in green. Forward was the American flag and aft the English jack, both formed of electric lights. Fireworks were set off from her launches and other boats which were moored near the yacht.

HOROKEY A POINT OF VANTAGE, Guns and Whistles Roar There - Model in

Hoboken took an active part in the Dewey elebration yesterday. People flocked into that eity from many points, and every place of vantage along the river front was occupied. The Stevens family issued tickets to their friends for admission to the grounds on Castle Point, which offered a choice position from which to view the parade. The point was crowded all day.

When the procession have in sight on its journey up the river every whistle and fire belt in the city screamed a welcome to the hero and ils gallant crew. Two large cannon, one of the other from the Boys' Brigade of Hudson County, were stationed in Hudson Square Park and seventoen shots were fired from The Boy's Brigade gun was under command of Brigadier-Gen Charles W Laws of the Brigade. The other was manned by a detachment from the Fourth Regiment N. G., N. J. inder the command of Lieut. John T. Pringle,

The old sloop of war Portsmouth, the training ship of the Battalion of the East Naval Reserve. of New Jersey, was anchored off 116th stree this city, where she did duty as a stake boat during the parade. The tugboat Edna was kept busy carrying visitors from Hoboken to the Portsmouth. Among those who viewed the parade from the Portsmouth were Gov Foster M. Voorhees, Secretary of State George Wurts, State Comptroller W. S. Hancock, Col Halsey, of Newark, and Major Edward Hoos, Col. Samuel D. Dickinson and Postmaster P. Farmer Wanser, of Jersey City The ships lying at the piers of the Hamburg-American, North German Lloyd, Scandinavian American and Holland-American steamship companies were trimmed from mast-tops to deck with strings of flags. The piers wer also decorated. A large portrait of Admira

also decorated: A large portrait of Admiral Dewey, twelve feet aquare, was displayed on the end of one of the piers of the North German Lloyd Steamship Company.

The demonstration arranged by the Progressive Club. of Cliffside Park, was carried out to the letter. At night the large model of the Olympia which the members erected on the bluffs overlooking the Hudson was liluminated. The model is 150 feet long and 45 feet high. It was was one of the most conspicuous displays on the Jersey shore during the night. On the front of the ferry house of the West Shore Railroad in Weehawsen was a large sign bearing the words: "Fire ken was a large sign bearing the words: "Fire when rou are ready, Gridley." The sign was illuminated by 3,000 electric lights. Another sign with the words, "Welcome Dewey," was displayed over the depot of the Lackawanna Railroad in Hoboken.

BRIDGE NEVER SO CROWDED.

During the Fireworks Last Evening Even Mail Wagons Had to Be Debarred. The largest crowd that ever tried to find ents or standing room on the Brooklyn Bridge. trains or trolley cars on a hot Sunday in midsummer was a mere handful when compared with the throngs of natives and visitors who took possession of the big bridge

structure last night and swarmed back and forth on the promenade, on both roadways and in the cars, in order to see the fireworks and to get a near view of the thirty-six-foot letters that apelled out in a blaze of light. "Welcome The north and south roadways were closed to all wagon traffic at 0:20 o'clock. An excep-

tion was made at first in favor of mail wagons. but at 8:30 o'clock the roadways were so jammed with people that even Uncle Sam's own wagons could not get through, and after that the mill wagons went over the ferries. Bicyc'es wer also barred and the wheelmen made much more fues about it than the carriage drivers. One disgruntled wheelman delivere I a harangue to the crows that was trying to get by him and his machine on the immediate necessity of a bicycle path on the Bridge. The rider was becoming more unpopular every minute, and finally some one yelled: "Oh, dry up; don't you know that Dewey's here?" Then the wheelman disap-

Chief Engineer Martin said that last night's crowd was the largest ever on the Bridge and that the structure had stood the test most satisfactorily. There was not the slightest dan-

A special force of 673 policemen, in command of Capt. John W. Enson, kept the growds moving, enforced the rules against the crossing of teams and bicycles and compelled the thousands of pedestrians going east to take the promenade and to walk back on the roadways. There was no clash between crowds trying to go in opposite directions. The only part of the promenade on which the jam was uncomfortable was between the entrance of the west end and the steps just this side of the towers on the Manhattan side. Between those two points there were fiveminute periods when it was literally impossible to move forward more than a foot. But beyond the steps the crowd got straightened out and moved forward in an orderly procession to the Brooklyn end.

The traffic on the trolley cars, the Bridge trains and the Kings County elevated trains was just as heavy as the rush of walkers on the promenades and roadways. Extra cars were running on nearly all the lines, and after numerous delays early in the evening they ran in good time on half-minute headway. At either end of the Bridge the cars were almost within arm's length of each other, but between the towers the motormen tried, with more or less success, to observe the rule that their cars should be 102 feet apart Another rule for Bridge cars was observed more carefully, and that was relative to the the Bridge. On every box car the gates were let down as soon as the start across was made,

It was not possible to see and appreciate to the bridge itself. On the roadway directly under the device, everything glowed with a brightness to be expected of a 125,000 candlepower illumination, and any one of fair eyesight would have had no trouble in reading the smallest print as long as the current was on. During the evening an occasional workburned out incandescent globe, and then the crowd wanted to stop and watch.

The police were even more insistent upon a strictly promounds view of the device than they were of other sights, and not a solitary ounger could remain near the sign. The device was of such length, however, and the promenade was made at such a slow pace that, with the simplicity of construction of the whole thing, any one who wanted to, could ake a mental memorandum of the sign for

ruplication elsewhere. Beside the sign the searchlights mounted on the south end of either tower helped to turn night into day. Besides these two there were a pair of searchlights on Brooklyn Heights, on the pilot houses of the Sound steamers tied up at East River docks, and on the roofs of tall buildings. There were fully a dozen playing on the East River from both shores and the Bridge. A big white steamer crowded with people would be lighted up for several minutes and then allowed to disappear in the darkness. Then again the great shafts of light would appear to battle with each other like giant fencers parrying and lirusting. Mearly every one of the big office buildings in Manhattan was lighted on every floor and decorated with colored lights. It was to view this wilderness of colored ight across which the great searchlights constantly played that exused the crowd to linger nd helped to crowd the first hundred yards of the Bridge promenade. The coming of the rain cleared the blockade effectually.

ABOARD THE MONMOUTH,

How the Governor and His Party Passed the Day and Evening.

The Government of the State of New York, executive, legislative and judicial, saw the parade and fireworks from the decks of the Monmouth, Gov. Roosevelt and his staff arrived aboard early and got a rousing reception. niral John Raines, commander-in-chief of the Monmouth, and a State Senator from Ontario ounty when he isn't otherwise engaged, was thoughtful enough to provide for him. The staff went to its stateroom, looked in, saw the ize of it and then distributed itself over the

remarked as he turned away from the state "That's just about large enough for the bot-

les. We'll be around later." Lieut - Gov. Woodruff was not aboard; but so far as could be learned, he was about the only member of the State government who wasn't.

United States Senator Redfield Proctor of his opera Vermont was there as the Governor's guest. probable that they will be played with as much Besides, there were Superintendent of Public dash and feeling as they have ever been. There Works Partridge, State Engineer and Surveyor. Bond, Comptroller Morgan, ex-Comptroller Roberts, Speaker S. Fred Nixon, Justice William J. Gaynor, Fisheries Commissioner William R. Weed of Potsdam, and State Committeeman William W. Worden of Saratoga.

The Monmouth ran down to Fort Wadsworth, turned around and came back to Tompkinsville, where she anchored and waited for the parade to start. While she lay there the quarantine boat Gov. Flower ran alongside and a naval militiaman aboard began to wigwag. Presently a boylah voice from the Flower called out: "Helio, Pana!"

"Hello, Ted!" went back the answer from the Monmouth, and then many of those aboard the larger boat, and everybody on the smaller boat, knew that "Papa" was Gov. Roosevelt, and "Ted" was Theodore Roosevelt, Jr. Mrs. Roosevelt, Miss Alice Roosevelt and one of the other Roosevelt hove were on the Flower with Mrs. Charles F. Roe, Mrs. Avery D. Andrews, Mrs. Jacob Miller, and some other friends ncheon was served aboard the Monmouth while she was waiting for the parade to start.

WARSHIPS ALL ILLUMINED.

They Stood Out Like Vessels of Fire in the Darkness of the Night.

The warships anchored off 100th street last night, with the exception of the Lancaster and the Chicago, were brilliantly illuminated and at a short distance looked like ships of flame ngainst the sky. Only a few of the excursion steamers visited the fleet during the evening because of the counter attraction furnished by the fireworks exhibited at the Battery, and the majority of the sightseers affout thereby missed one of the most magnificent spectacles

ever seen in these waters.

The illumination of the Brooklyn was the finest of all. Incandescent lights outlined her hull, masts and three tall smokestacks. The turrets were almost entirely enclosed in circles of light, and the big guns projecting from them were wrapped in the same fashion as the smokestacks. At the stern the name, "Brook-." was shown in letters of fire. The Indiana and the Massachusetts were

close rivals of the Brooklyn for first bonors The entire outlines of these two vessels were shown in brilliant lights, even to the smallest detail, such as the signal yard on the foremast and the fighting tops. The New York and Texas were also fine fire pictures, but little attempt in this line was made on the Olympia. The officers of the Chicago had no time to fix up their vessel, and no attempt to Illuminate the Lancaster was made. The illumination of the Olympia consisted of a long string of incandescent lights, running from the bow to the top of the foremast, across to the main mast and down to the stera. Under the bridge was the name of the flagship in large letters.

The ships from ashort distance looked like a phantom fleet and made a fine show for observers along liverside Drive or affoat. Surrounding the fleet were scores of steam yachts, all brilliantly illuminated, adding to the beauty of the spectacle.

CREDIT FOR DEWEY'S SELECTION.

secretary Long Says it Belongs to No Hu-

man Being Except Dewey Himself.

WASHINGTON, Sept. 20.-Another chapter was added by the Secretary of the Navy to-day to the controversy, if it can be so called, as to who was responsible for Admiral Dewey's assignment to the command of the Asiatic naval The subject came up incidentally between President McKinley and Secretary Long at the Cabinet meeting this morning, and Mr. Long found that the President agreed with him as to the circumstances connected with the selection of Dewey. In conversation with THE SUN representative this afternoon Secretary Long reiterated what he had said yesterday concerning the way in which Dewey's selection for the Asiatic billet was brought about and added some interesting things about the part played in the matter by the Bureau of Navigation. whose chief then, as now, is Rear Admiral A S. Crowninshield. According to the Secretary's statement Admiral Dewey was the natural choice of the bureau for several reasons. The Secretary repeated that Dewey was his own choice of the officers who had been suggested for the place. To the reporter Mr. Long said:

"It is true that, as often happens, some Senators and others wrote or spoke to me and to the President about Dewey's assignment to the Asiatic squadron in 1897, and some others about another officer for the same command. But the President's memory is, and mine is the same, that I had no werd or suggestion from him about the matter till I called on him one day and said: Here are two or three names for the place, of which I recommend Dewey's.' He approved my selection, which was the first time the matter was spoken of between us, he being satisfied from what he already knew and from the information I had obtained that Dewey had the qualities of level-headedness and discretion needed for the place. The matter had been canvassed by me with the Bureau of Navigation, which is charged with such matters. It was a natural selection, and would have been made if not an outside word had been said. The credit of it beiongs to no human being except Dewey himself, who, by reason of his special fitness, by rank, by his turn to go to sea and command a squadron, and by his meritorious qualifications, was the natural designation of the Bureau of Navigation." statement Admiral Dewey was the nature

HE WILL PLAY "EL CAPITAN,"

Bandmaster Sousa Will Repay To-day ar Honor Done Him by the Olympia Long Ago. Sousa, when he marches with his band today, just ahead of the Admiral and the Olympia's men, will have his musiclans play numerous selections from his opera "El Capitan," and it is is very good reason to expect this, for when Dewey's squadron sailed out of Mirs Bay on its way to attack Manila, the ships wer in close order with the Olympia leading and her band gaily playing the march from "El Capitan." Bandmaster Sousa was immensely pleased when he read of this later and in return for the honor thus done his composition he proposes to whoop i up to-day for the flagship's men.

KILLED TRYING TO SAVEA BOY'S LIFE. Joseph Smith Ran Into a Burning Brooklyn House and Was Brought Out Dead.

While the occupants of the four-story brick flat house at 23 Poplar street, Brooklyp, were on the roof watching the display of fireworks last night, a lamp in the parlor of Charles Cox on the first flat exploded and set fire to the building. The flames spread quickly and in a few minutes a second alarm was sounded. Some one in the street cried out that John Anderson, the young son of G. A. Anderson, was in his room on the third floor. Joseph Smith of 82 Fulton street, who was passing at the time, dashed into the burning building, followed by William O'Connor, a McKenney street boy, rescued young Anderson, but Smith was overcome by the smoke, and after the fire was put out his dead body was found lying on the stairs leading to the roof. His body was removed to the Fulton street police statt n. Young O'Connor was burned on the right hand and nose.

The tenants who were on the roof were panic stricken when they learned that the house was on fire. They ran to the edge of the roof and escaped by jumping to the roof of the Mrs. G. A. Anderson had her right knee cap

DEWEY'S BOSTON VISIT.

He Writes That He Cannot Be Definite About It Until He Goes to Washington. BOSTON, Sept. 20.-Wallace D. Robinson President of the Boston Chamber of Commerc and Chairman of the Joint Committee of that body and the Home Market Club on the Dewey visit to Boston, received this letter to-day;

visit to Boston, received this letter to-day;

"On BOARD THE FLAGSHIP OLYMPIA.

"Welfore B. Robinson, Chairmon, Joint Committee.

"I have the honor to acknowledge the receipt of your letter of Sept. 20, inviting me to be in Boston in November. I thank you for your courteous letter and cordial invitation, but regret that I cannot make any engagement until after I have been to Washington. The Secretary of the Navy has conferred with me regarding the subject of a visit to Boston and I have requested him to leave the matter open until after I have seen him. Very sincerely yours,

"GEORGE DEWRY." Fing Flying in Holland on Dewey Days.

United States Consul Hill at Amsterdam, Holland, sent a cablegram to the Chairman of the Committee of Arrangements yesterday in which he said that he had raised the American flag over the consulate in honor of Admiral Dewey and his men and that the flag would fly there throughout the two days of the celebra-tion in New York.

Governor at Quarantine Last Night. Gov. and Mrs. Roosevelt and the Governor's staff and party visited Quarantine last evening as the guests of Dr. Doty on board the steamer Gov. Fower and watched from there the display of fireworks in New York.

DEWEY'S SHIPMATE YEARS AGO. John Donne of Jersey City Wants to Hear from the Men of the Wabash

chant vessels, and last the smaller craft.

John Donne of West Side avenue, Jersey City, who served in 1958 and 1859 aboard the frigate Wahash, when Admiral Dewey was a midshipman on the frigate, is anxious to learn if there are any other sailors in this part of the country that were on the Wabash then. He wants to hear from them so that he may arrange a visit to the Admiral before he leaves

for Washington. Doane is 65 years old. DEWEY ARCH IS FINISHED.

Workmen Were Busy on It Until Nears,

All the fears that had been expressed during the past week that the Dewey Arch would not completed in time for the parade to-day were set at rest shortly before 11 o'clock last night, when the workmen quit and began to tear down the scaffolding. This work was soon completed and the only wood left standing was the board fence that was erected to keep the crowd out. That will not be removed until a short time b fore the parado is due to reach the arch. All the extra police guard was withdrawn, only four men remaining there on dury.

Bayonne's Upronr in Honor of the Admiral-The patriotic people of Bayonne, N. J., made a lot of noise in honor of Admiral Dewey yesterday. At sunrise, from all of the big bells of the city's fire-niarm system, an alarm of four tens was sounded. The whistles of the big oil refineries and other factories at Constable Hook joined in the roar, each shrisking an Admiral's eslute of seventeen basts of two minutes' duration each. The locomotives in the New Jersey Central Railroad's roundhouse, the bells of churches and schoolhouses and the whisties of various small factories added to the uproarious salute, which could be heard for miles. Muskerly and fog-horns also augmented the din. At noon the salute was repeated. Admiral Dewey was informed by telegraph of the demonstration's import. Throughout the citr, places of business and residences were profusely decorated with flags and bunting, and thousands of nortraits of the nation's naval here were numerous displayed. In the evening there were numerous displayes of fireworks. This morning Company I. Fourth Regiment, N. G. N. J., under command of Lieut James R. diatchel, and a detachment of former members of Company I. Fourth Regiment, New Jersey Volunteers, will leave town to take part in the big land parade. oil refineries and other factories at Constable

Touth Pennsylvania Leaves Philadelphia. PHILADELPHIA, Sept. 29.—The members of the Tenth Pennsylvania Regiment visited the National Export Exposition this afternoon, They were welcomed by Mayor Ashbridge and Director-(jeneral Wilson. Col. Barnett presented to the city a cannon that was captured from the Spaniards in the Philippines. This svening, eacorted by members of the Third Regiment, the Tenth left for New York.
